Service**

# Who we are

Welcome to the Angels for a Heavenly Clean, we are working with existing and many new clients this difficult time to provide a cost effective complete sanitisation solution, ensuring your workplace can remain open, it is safe for you, your staff and clients

Regardless if there has been a known contamination or not this pandemic has put cleanliness and hygiene at the top of the agenda

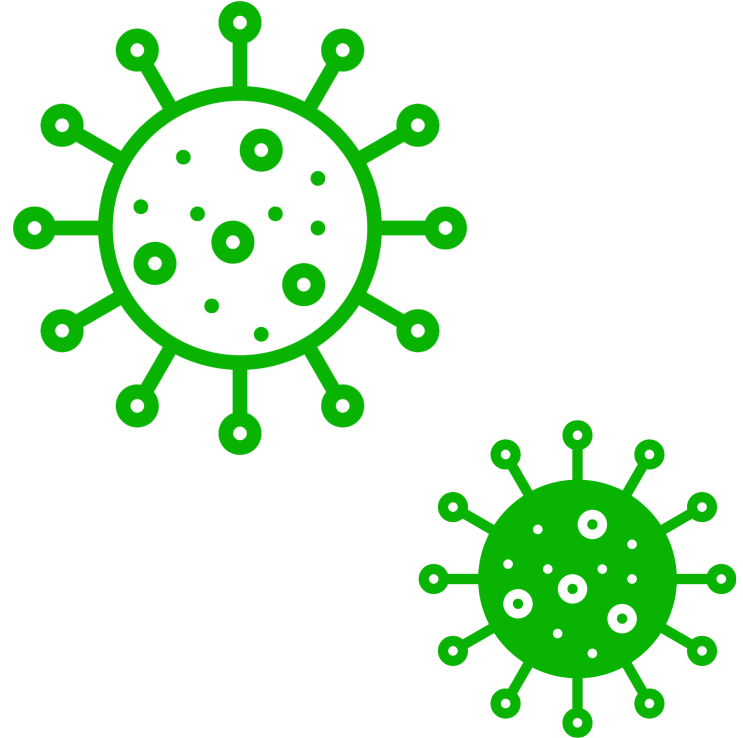

Angels for a Heavenly Clean are 'On the frontline of the fight against this pandemic with new advanced hygiene technology we are taking cleaning to the next level'

A full hygiene report can be produced free of charge showing additional areas of concern and where improvements can be made.

# How do we do it?

We use the latest Angels ULV Nano Particle Machine. This advanced sanitiser will dispense Nano particles of under 5 microns fired at a rate of 300,000 per hour meaning it delivers NT Disinfectant one of the fastest acting and most powerful Virus, Bacteria, fungi killing products available today killing 99.999% of Virus's including the Corona Virus Family, Bacteria, fungi & is yet so eco-friendly causes no harm to plants, animals and aquatic life. Producing Nano particles of under 5 microns fired at a rate of 300,000 per hour the very fabric of the whole area is sterilised this includes carpets, furniture, walls, office and electrical equipment where no other cleaning product can reach. The sanitised area is free to use again within 15 minutes. When traditional sprays and wipes dry, they are effectively useless Angels ULV Nano Particle Machine delivers the sanitising agent deep into the very fabric of the area that is being sterilized and continues to work for at least 7 days after the initial application.

## EMERGENCY TREATMENT

Emergency treatment is a reactive, fast response service which is suitable for situations where a building or site has been directly affected by a virus or infection.

We'll aim to get a trained cleaning specialist to your site & carry out cleaning works within 24 hours\* of your first contact with our team.

Disrupting cell wall permeability

99.99% decontamination guaranteed

## Our process

**We've put together a step-by-step guide outlining our infection cleaning process, so you'll know exactly what to expect from the very first phone call.**

# Step 1 | Initial enquiry

Our professional team will take your call, email or online enquiry and go through your situation, discussing the location and current condition of the site in question.

After gathering the required information, your dedicated advisor will recommend a bespoke infection cleaning service, which fits around your exact needs.

We'll arrange a suitable time and date for a site risk assessment and cleaning works to be carried out by one of our expert cleaning service providers.

Your advisor will then be on hand throughout the process for and queries that you may have.

## Step 2 | Pre-work preparations

On the arranged date, our specialist cleaning provider will arrive on site to conduct a full risk assessment and prepare the area for decontamination cleaning.

You will be provided with a copy of the risk assessment for your own records and peace of mind, please check this upon receipt to ensure that you are comfortable with everything included.

Your specialist will ensure that the site is adequately lit, ventilated and is generally safe to conduct works in, advising you of any issues they come across immediately.

Only once all of this is carried out to the appropriate standard, will work begin.

## Step 3 | Conducting cleaning works

Once all parties are in agreement with the risk assessment, the decontamination works can begin.

Your cleaning specialists will work swiftly and methodically through the entire area, ensuring that every inch is thoroughly cleaned to the highest possible standard.

During the process, the site in question will be inaccessible and must remain so until the specialist advises that the area is safe to enter.

If you have any queries during this time, your *Angels* advisor will be on hand to take your call.

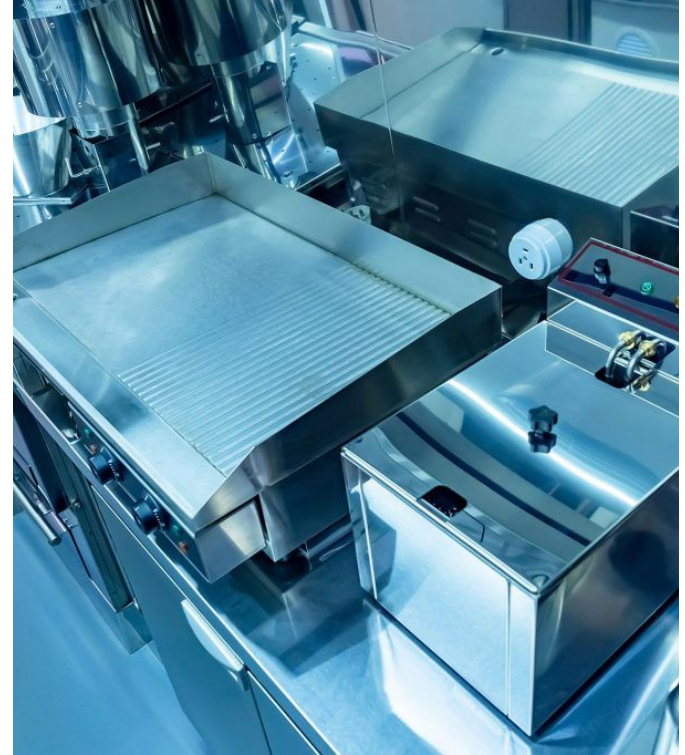

## Step 4 | Post works

We will agree a follow up program to keep your business, staff and clients safe.

We provide Hard and Soft Copy certification to display on site and online.

We are always on hand at the end of the phone for advice whenever you need us

Dedicated specialist advisor throughout the entire infection cleaning process

Industry leading, accredited & fully insured service providers carrying out all cleaning works

Fast, efficient response times - emergency cleaning within 48 hours of first enquiry
